## PROJECT 3: EXTERNAL CSS

*The home page of Tyler Kealey's music website. <https://tylerkealey.com/music> (<https://tylerkealey.com/music>).*

### PROJECT DESCRIPTION

Project 3 requires you to create a **Music Artist Website** for a real band, group, or individual **MUSIC** artist of your choice. We don't have enough time in the class for you to create a complete **Music Artist Website**, so will create three separate HTML5 webpages (**Home**, **Music**, and **News**). For this website, you will have to use an **External Style Sheet**. An **External Style Sheet** is a separate file, designated by a **.CSS** file

extension, that is linked to a web page. All
